2011 Kentucky Asthma Program Fact Sheet-Bluegrass District

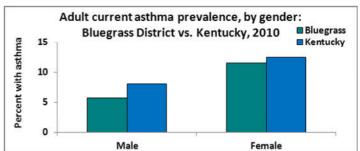

- The Bluegrass District of Kentucky is comprised of 17 counties: Anderson, Franklin, Woodford, Mercer, Boyle, Lincoln, Garrard, Jessamine, Fayette, Scott, Harrison, Bourbon, Nicholas, Clark, Madison, Powell, and Estill.
- The 2010 Bluegrass District population was roughly 781,000, with about 176,000 being less than 18 (children), and about 605,000 being 18 or older (adults).
- According to the Behavioral Risk Factor Surveillance Survey (BRFSS), for 2010, it was estimated that 15,000 children, and 51,000 adults in the Bluegrass District currently had asthma.

PREVALENCE

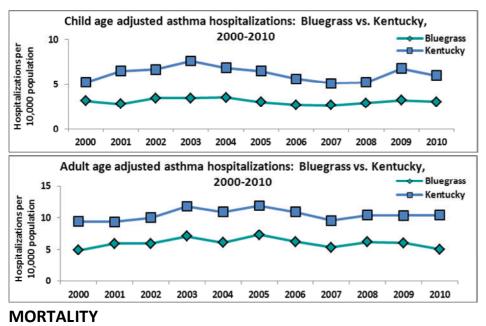

According to the BRFSS, among children in the Bluegrass District it was reported that boys have lower prevalence rates of current asthma compared to Kentucky rates, while girls have higher rates of current asthma when compared to state rates. Adults in the Bluegrass District overall reported roughly the same prevalence rates of current asthma compared to state rates.

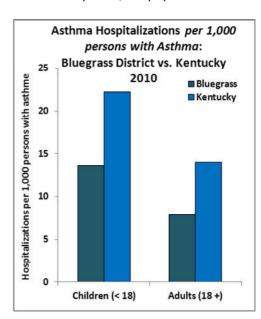

HOSPITALIZATIONS

- According to data provided by the Office of Health Policy, between 2000 and 2010, the Bluegrass District averaged 4.5 asthma hospitalizations (per 10,000 population) per year, while Kentucky averaged more- at 8.3 asthma hospitalizations (per 10,000 population) per year over the same 11 year period.
- ➤ In 2010, among children in this district, there were 20.5 asthma Emergency Department visits per 10,000 population, compared to the state rate of 20.0 per 10,000 population. Among adults in this district, there were 21.5 asthma Emergency Department visits per 10,000 population, compared to the state rate of 29.2 per 10,000 population.

According to data provided by the Office of Vital Statistics, between 2000 and 2009, the Bluegrass District averaged 6.7 deaths from asthma per year. Over this ten year period, the Bluegrass District averaged 14.7 asthma deaths per 100,000 adults with asthma, compared to the state average of 17.1 asthma deaths per 100,000 adults with asthma.
